Every grateful patient has a valuable story to tell

At Frederick Health, our patients and families often ask how they can say 'thank you' after a positive experience with us. Whether you or a loved one had a simple procedure or an extended stay at our hospital, you may have found comfort and reassurance through one of our staff members or volunteers offering kind words or an encouraging smile. Perhaps your positive experience was due to the environment in which care was received. Many patients are grateful simply for the convenience of having a hospital that offers expert care, a wide-range of services and programs, and leading-edge technology right here in Frederick.

Our Grateful Patient Program provides a meaningful opportunity for you and your loved ones to say 'thank you' by sharing your personal words of gratitude. While every experience is unique, our mission always remains the same: to positively impact the well-being of every individual in our community. This mission is brought to life through each grateful patient story. We invite you to share yours today.

A grateful patient story is so much more than just an expression of thanks. When you share your words of gratitude, you are celebrating and encouraging all healthcare professionals and volunteers and those who support their efforts. It serves as a special reminder of why we do what we do.

Most importantly, your story will serve as a source of hope and inspiration for others who seek our care.

Thank you for sharing your story. You inspire us.
